

## HOME CARE, WHAT MAKES US DIFFERENT?

We provide Live-in & Domiciliary Care to patients leaving hospital or for those who are living with long term conditions within the community. We provide a combination of skilled carers and qualified nurses working as a team to support people with rehabilitation and re-ablement, or for people with long term and complex health conditions we provide enabling care and nursing support. We provide a unique

service to bridge the transition between hospital & home. We provide fully vetted staff with experience, qualifications and skill to undertake complex care and nursing tasks. Our teams work in collaboration with other healthcare professionals ensuring a holistic approach to care. We continuously work to deliver quality & enabling care and ensure a speedy recovery for the patient to enhance your hospital's services and reputation.

- NHS & Social Care
- Agency Staff
- Recruitment Projects

### OVERSEAS RECRUITMENT

- Lead Senior Manager
- In country team
- No outsourcing of recruitment function
- UK Audit & Quality Assurance

# UK RECRUITMENT

We have a dedicated recruitment team within the UK based out of our offices in Berkeley Square House, London who undertake a range of recruitment activities for customer organisation in both Health and Social Care. The team has the capacity, experience and skills to recruit for small or large projects for both private and NHS customers across a range of professional roles, including Nurses, Allied Health Professionals, Pharmacists, Dentists and Doctors.

We provide staff as either agency staff for short term support for gaps in rosters, long term absences (including maternity leave) or undertake a full recruitment campaign on behalf of the contracting organisation.

For a major recruitment project can undertake the complete service from creation of the campaign, marketing/advertising, initial selection, through to interview using professional clinicians and vetting in line with the NHS Employment Check Standards or a subset there of. We will work with the commissioner at every point of the recruitment pathway to ensure there is effective communication and that the project is within scope, costing and on time. In this way we ensure you professional service and staff to fulfil your professional roles.

“We are the only international Nursing recruitment team with a dedicated office in country which is managed and audited by the UK team, guaranteeing a quality recruitment service and fully vetted professional staff!” – Director LinkNursing

# OVERSEAS RECRUITMENT

We provide what we believe to be a unique Overseas recruitment function, with dedicated offices and management teams in each of the countries from which we recruit Nurses, Doctors and Allied Healthcare Professionals (AHPs) through LinkNurse International Recruitment.

None of the recruitment is outsourced to third parties or sub contracted to local companies, but is undertaken by staff and recruitment specialists employed by the company. Each team understand and maintain the company's values and ethos, and work together to source the best candidates required by you the commissioning employer.

The Directors of the company work closely with the in-country resourcing team, visiting at least every quarter, undertaking conferences weekly and ensuring all offices provide an integrated Audit and Quality Assurance reporting structure in line with the UK business.

For large contracts a UK Project Lead Consultant will set up the project in country with the local team and remain in country until the project has commenced and the first cohort of recruits have been processed and the service provided its first Audit and QA report to the UK office.

The Project Lead Consultant (PLC) is the contact point for the commissioner until completion of the project. Our unequalled expertise in the recruitment field would lead you to the highest calibre nurses, Doctors, and AHPs, your future staff.
