- Nursing Staff
- Staff provide 24 hour care and support

HOME CARE, WHAT MAKES US DIFFERENT?

We provide Live-in & Domiciliary Care to patients leaving hospital or for those who are living with long term conditions within the community.

We provide a combination of skilled carers and qualified nurses working as a team to support people with rehabilitation, or for people with long term and complex health conditions we provide enabling care and nursing support.

Hospital Discharge

We provide a unique service to bridge the transition between hospital & home. We provide fully vetted staff with experience, qualifications and skill to undertake complex care and nursing tasks tailored to each persons needs. Our teams work in collaboration with hospital healthcare professionals ensuring a holistic approach to assessment and care delivery.

HOSPITAL DISCHARGE

- Support when you most need it!
- Live in or Visiting care and support teams
- Work closely with hospital clinicians

We continuously work to deliver a quality & enabling service to ensure you a speedy recovery. In this way we support you and your family to get back to normal as quickly as possible, support you with daily chores and provide support with exercises and rehabilitation working with your Occupational and Physio therapists.

Nurses are there to support with any complex care needs including medication, dressings, removal of stitches or any other relevant function in agreement and working in partnership with your clinician, GP and District Nurses.

Long Term Conditions

Similar services can be provided for people with complex long term conditions including Dementia, Physical & Sensory Disabilities, Aquired Brain Injury, Learning Disabilities etc. Services will usually be provided as either Live In packages of care or large packages of care on a visiting basis.

The services will be tailored to meet the individual care and health needs of the person and we will work in partnership with the carers, family and professionals to ensure their choices, preferences, aspirations and best interests are met.
